

**TABLE 2: VISCOSITY OF MERQUEL™ 45
AT VARIOUS TEMPERATURES**

Temperature	°F	(°C)	Viscosity cP
	23	(-5)	4.80
	32	(0)	4.10
	34	(1)	3.40
	68	(20)	2.94
	77	(25)	1.96
	104	(40)	1.46

NOTE:

Pumps and piping systems should be designed for viscosities at the lowest ambient temperatures encountered at the end user's location.
